INDEX

+ Aesthetics

+ Resistance

+ Durability

Brick art _

The selection of the raw material, the techniques used and the innovation applied to the processing of the brick considered it an art.

UNIQUE

A wide range of solutions to provide “a unique skin” to every building _

VERSATILE

The characteristics and properties of the bricks designed and used for endless purposes _

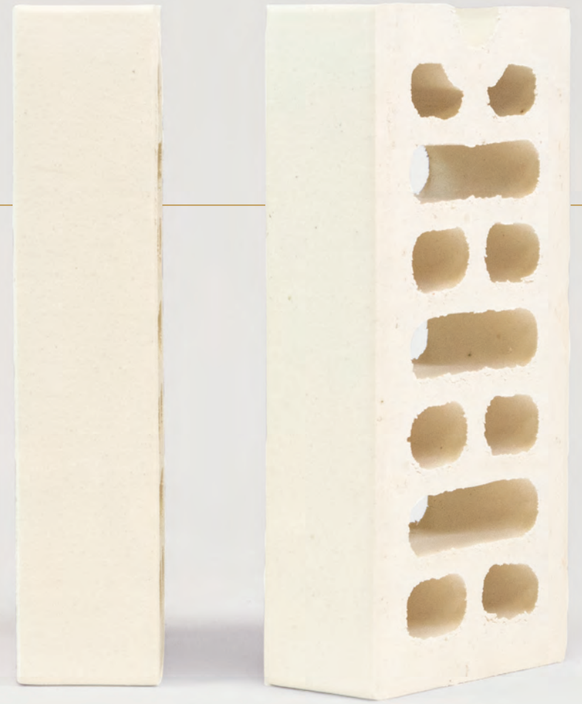

INNOVATOR

The durability and utter resistance of the Gres Clinker are hallmarks of strength to consider the face bricks the most _

SUSTAINABLE

The brick as a key element for sustainability through the circular economy of the construction sector _

The Gres Clinker range obtains distinction through a wide range of finishes that vary depending on the color and the different types of joints.

The union of a defined and clear aesthetic, together with functionality and high technical performance, make each project outstanding.

No-Frost

Low water absorption (≤ 6 %)

High compressive strength

No efflorescence

Resistant to external agent

True clay colors

DURABILITY, PERFECTION

We are so confident that our bricks will make history that we offer a century's guarantee.

100 YEARS GUARANTEE from the very moment of purchase at the factory and installation on site.

This guarantee is not only the result of the conviction of all the staff of La Paloma Cerámicas, but also based on the recognition and trust that we have received from our customers. We take pride of having numerous long time **satisfied customers** engaged by the **quality** of our bricks that are used not only in smaller projects but in the most ambitious constructions.

BUILDING El nuevo rural | **ARCHITECTS** David Robles Pedraza, Arantxa Senosiain | **COLOR** Levante, Ochre Range

THE ORIGIN

The finest selection of clays for the world's most resistance face bricks _

As wine, the best clays developing true colors with an utter resistance _

An exceptional raw material based on the use of more than 30 clays obtained in our national territory that withstand very high temperatures. The firing and the techniques used in the production of the brick make each piece unique in terms of colour and aging.

\+ clays

In addition to eternal resistance, the combination of clays provides to the brick a true mass colour consistency that does not vary with time or due to the external agents.
